Taking Coolwaves to the Max

Relentless Evolution in Body Contouring

Onda Plus stands out in **Aesthetics, Dermatology and Body Shaping**

DEKA
Innate Ability

DEKA
Innate Ability

Onda Plus Quick Wins:

Localised Fat | Cellulite | Skin Laxity

Key Principles:

DEKA **Onda Plus** maximises the efficacy of Coolwaves® – exceptional microwaves that selectively target fat cells, skin laxity and cellulite through a new handpiece that acts on microcirculation.
This offers a complete body shaping treatment and optimises results.

Why choose Onda Plus:

3 treatments in 1.
Onda Plus acts on localised adiposities, cellulite and skin laxity all in a single application.

The **PLUS** handpiece stimulates microcirculation, maximising the treatment and banishing cellulite.

The patient experiences an even more comfortable treatment with **Onda Plus**, completing the clinical path.

Body Sculpture: Coolwaves® are the Last Frontier in the Medical Aesthetic Industry

Coolwaves® induce a regenerating and toning but non-invasive action, effective over time and safe. With **Coolwaves®**, **Onda Plus** reduces localized adiposities all over the body, in particular on the abdomen, thighs, hips and submental area. It dissolves fat, tightens and contours the skin, firming up tissues.

coolwaves®

3 in 1 effect, and the results are immediately visible and long lasting

Fat

Coolwaves® penetrate deeply, demolishing the cell membranes of subcutaneous adipose cells to dissolve localized fat deposits.

Cellulite

Coolwaves® stimulate the connective tissue surrounding the adipose lobules of the cellulite, diminishing the “orange peel” effect.

Skin Laxity

Coolwaves® cause collagen fibres contraction in the dermis, and stimulate production of new collagen, thereby tightening and toning the tissue.

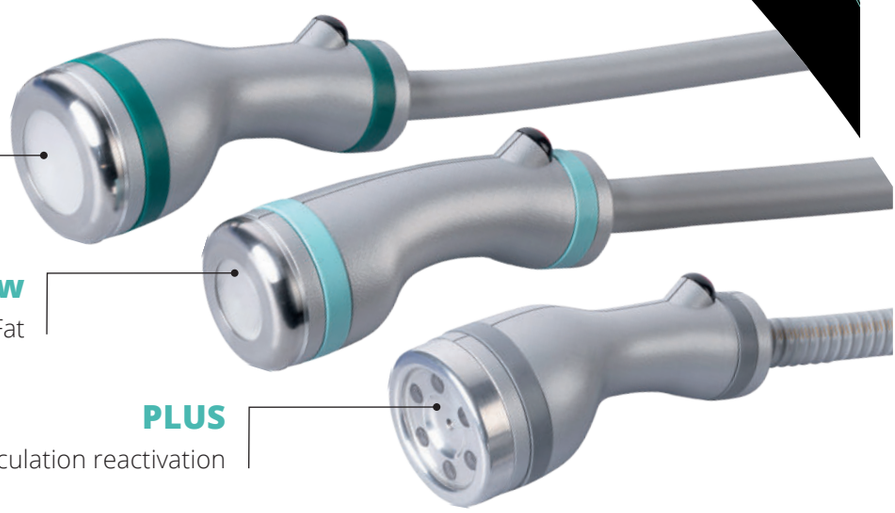

THE SCIENCE BEHIND

onda plus

Onda Plus – 3 handpieces for complete body treatment

In addition to **Deep** and **Shallow** - specifically designed to emit Coolwaves® in a controlled manner focusing energy on fat, skin laxity and cellulite – **Onda Plus** features a new handpiece, designed for **draining massage**, thus **maximising the effects of Coolwaves® technology**.

Deep
Best for Localised Fat

Shallow
Best for Cellulite | Skin Laxity | Submental Fat

PLUS
Best for microcirculation reactivation

The new PLUS handpiece for easier and more effective massage and drainage

Conceived as a result of the experience with Coolwaves® technology, the **new PLUS handpiece** was developed to interact with it. It emits airflow which in turn generates a series of waves that propagate on the treated area, reactivating the superficial microcirculation, thus accelerating the natural return of bodily fluids.

The PLUS handpiece can also exert pressure on the cutaneous, subcutaneous and adipose tissue, whilst the six LEDs transmit a pleasant sensation of warmth to the patient.

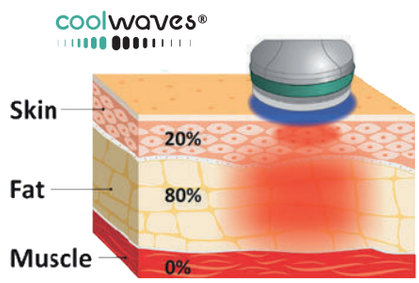

THE SCIENCE BEHIND

onda plus

Safety & Effectiveness
No damage to skin surface

The superficial derma is preserved, ensuring total patient comfort and minimising side effects and inflammation thanks to the **contact cooling system** integrated into the handpieces

Thermal Viewer: an additional aid in the proper execution of the treatment (optional)

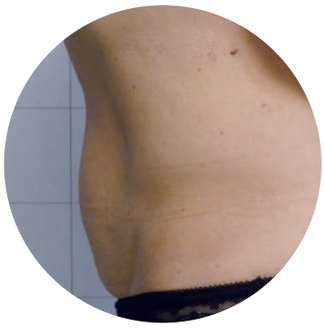

With the **Thermal Viewer Kit** it is possible to monitor the treatment execution on the treated area and the distribution of warmth through the thermal camera and the connected tablet. The patient can watch the execution of the treatment with the operator and perceive, in real time, the quantity of heat channelled by Coolwaves® inside the derma through the various colours of the treated area.

The Floor to Practitioners

"The demand for non-invasive body treatments is skyrocketing. To meet these demands, I use various technologies, but with Onda Plus I can treat localised cellulite adiposity and laxity in a deep, direct and selective way. Coolwaves, unlike other technologies, actually acts much deeper and significantly reduces the treated flaw, restoring skin elasticity.
The results that can be achieved with Coolwaves are maximised with the PLUS handpiece, acting on the microcirculation and enabling drainage of the fluids that move during the treatment. The PLUS handpiece has a lymphatic drainage effect and eliminates superficial fluid retention, thus banishing the orange peel. The derma is therefore improved, accumulated toxins are removed, the results of which is immediately shown by the tone and colour of the skin.
Treatment with PLUS handpiece is greatly regarded by patients, as it provides them with a pleasant experience and a visible result."

Dr. **Cristina Cuciti M.D.**, Dermatologist (Italy)
